Abstract:

In 2040 many of you will be running mining companies but it won’t look like a mining company looks today. In this session we will start by discussing the factors that are disrupting the mining industry some of which we think are given and some could vary depending on how global politics and the economy develops. We will then look at a number of scenarios that we could be facing in 2040 and finally will look at what a mining company, with a focus on the operations, will look like in 2040.

Bio:

Paul Mitchell leads EY’s Global Mining & Metals business of over 7,000 professionals around the world. When you think of EY you probably think of Tax and Audit but our fastest growing business is our consulting business which is now our largest service line. Our team includes all of the professions you would find in a Mining business. He spent 10 years at Global Mining companies and the last 20 years at tier 1 consulting firms. He focuses on developing and implementing strategies at some of the world largest mining companies with a particular focus on building value. Paul is a member of our Industry Advisory Council and a Board Member of the Bradshaw Research Institute for Mining & Minerals.
